Michael Miller, Chartered Special Needs Consultant (ChSNC), OrrstownBank

Question & Answer Period Will Follow The Presentation

What is a “Life Care Plan”?... It is a holistic approach involving a network of advisors in the development of a life care plan that can help a person with a disability maintain the lifestyle that he or she needs. This coordinated program of future care planning includes financial and legal strategies.

You don't have one. Why?... Don't think you can afford it. Don't know where to start. Think it's too early... or perhaps too late? Being proactive about developing a Life Care Plan can help you be more proactive in reducing stress, resolving issues, less decisions made under pressure and less reactive situations.

Who should Attend?... Individuals, families, case managers and community members who want to learn about legal and financial instruments for individuals with special needs.
